APPLE SEEDLINGS BOXED RIGHT.

### FROST PROOF PACKING.

A new "wrinkle" in packing—notice the cut—we use heavy tongued and grooved boxes. The first lining is a heavy corrugated paper. The corrugations are turned in, then another lining of smooth paper. This makes a complete dead air space between the papers. While this makes expensive packing, we charge no more for it than you pay for the ordinary packing. We are mutually interested with the purchaser in seeing that our stock gets through unfrozen.

You will notice by the cut that we use a roll of shingle-tow around the edge of the box and pack the seedling with the roots to the center.

The season of "cold waves" is at hand and the question of packing is of vital importance.

We offer as follows:

- Apple Seedling, #1, 3/16 and all up, straights (special prices)
- Apple Seedling, #2, 2/16 to 3/16, strong grade (special prices)
- Apple Seedling, #3, for lining out to bud.....\$1.00 per M.

This stock is free from aphids and disease and is the finest we have ever raised. It is all graded and ready for immediate shipment. We always ship in refrigerator cars and when packed in the above manner, the danger of freezing is reduced to a minimum.

We box free where cash accompanies the order.

Our stock is all covered by Entomologist's Certificate.

They are coming from one of the leading houses in France, the same firm which furnished the seed for the output shown in above photo. We offer at the following price for cash.
